row read pairs	1922410
average read length	149.5
unique mapped pairs	1846510
gender	M

Distribution of bin depth in sample

This graph shows the distribution of the bins according to the depth of the sequencing. The blue curve represents the distribution of the bins in the PON. Ideally, the histogram and the blue curve match completely. If not, this can indicate larger deletions (the first peak decreases) or larger amplifications (the third peak increases).

Calculated numerical karyotype:
